

## Lehmann&Voss - LUVOMAXX®

Product	Chem. Description	Features and Benefits
<b>LUVOMAXX BHT</b>	Butyl Hydroxytoluene	Non-staining hindered-phenolic antioxidant, low molecular weight, may be easily emulsified. Prevents the development of rancidity and the resulting increase, very efficient peroxid radical delayer.
<b>LUVOMAXX CDPA</b>	4-(1-Methyl-1-Phenylethyl)-N-[4-(1-Methyl-1-Phenylethyl)Phenyl]Aniline	High thermal stability. Synergistic with steric hindered phenolic antioxidant and imidazol derivatives.

Product	Chem. Description	Features and Benefits
<b>LUVOMAXX ODPA</b>	bis(4-(1,1,3,3-Tetramethylbutyl)Phenyl)Amine	High thermal stable aminic antioxidant, easy dispersible. Works as oxygen scavenger. Synergistic effects with steric hindered phenolic AO's.
<b>LUVOMAXX SDPA</b>	Diphenylamine Derivate	Very high molecular weight compared to similar aminic antioxidants. Reduced volatility and suitability for use in high temperature applications.

Product	Chem. Description	Features and Benefits
<b>LUVOMAXX TMQ</b>	1,2-Dihydro-2,2,4-Trimethylquinoline/Oligomers	General purpose, high active aminic antioxidant. Excellent resistance to thermo-oxidative ageing, even at lower treat rates, cost efficient. Works as oxygen scavenger. Reduce oil bleeding in glykol based greases.
