

Products	Description	Application
PM 226	Non-fluorochemical Product	Imparts durable water absorbency and stain release properties to 100% polyester fabrics or yarns
PM 3705	Hydrocarbon product	Provides durable stain repellent properties e.g. on coatings
PM 3870	Nonfluorinated water based product	Provides durable stain repellent properties e.g. on coatings
PM 3869	Non-fluorinated, solvent based	Provides stain repellent properties on a variety of substrate
PM 3888	Hydrocarbon-based product	Provides excellent water repellency to many synthetic fabrics
PM 2688	Hydrocarbon-based product	Provides excellent water repellency to many synthetic fabrics and cotton
PM 2740	Mildly cationic emulsion, no fluorinated chemistry included	Provides great stain repellency properties to fabrics
PM 870	Fluorochemical flake	Provides excellent water repellency and can be incorporated into polyolefin and other synthetic resins
PM 5000	Water miscible fluoropolymer emulsion	Imparts excellent water, oil and stain repellent properties and can be applied on high porosity substrates
PM 5805	Fluoropolymer resin dissolved in Isopar L and Dipropylenglycol Methylether	Imparts excellent water, oil and stain repellent properties and can be applied on porous hard surfaces
PM 5801	Fluoropolymer resin dissolved in Dipropylenglycol Methylether	Imparts excellent water, oil and stain repellent properties and can be applied on porous hard surfaces
