

LUVOGEL® Manufacturer: Lehmann&Voss&Co.

Products	Description	Application
LUVOGEL® 4 LUVOGEL® 4 B	Montmorillonite, organically modified	For low to medium polar systems, polar activator recommended
LUVOGEL® 7	Montmorillonite, organically modified	For medium to high polar systems, polar activator recommended
LUVOGEL® SA 1	Montmorillonite, organically modified	For a wide range of polarity, self-activating
LUVOGEL® SA 10	Montmorillonite, organically modified	For low-polar aliphatic systems, selfactivating
LUVOGEL® G58	Layered silicate, organically modified	Used as a rheological additive and anti-settle additive in unsaturated polyester resins, epoxy resins and vinyl esters, especially in styrene-containing and solvent-containing formulations of different polarity, but also in solvent-free epoxy resin systems
