

## KING Industries - NA-LUBE®

Product	Chem. Description	Features and Benefits
<b>NA-LUBE AO-130</b>	Nonylated Diphenylamine	Excellent oxidation resistance to lubricants and greases. 100% active substance. Mineral oil free and easy to handle.
<b>NA-LUBE AO-142</b>	Butylated, Octylated Diphenylamine	Excellent oxidation resistance, high TBN and high nitrogen content. Easily blended into all types high performance lubricants. Synergy with NA-LUBE AO-242. Compliance with FDA 21 CFR 178.3570.

<b>Product</b>	<b>Chem. Description</b>	<b>Features and Benefits</b>
<b>NA-LUBE AO-210</b>	2,6-di-tert-Butylphenol	100% active phenolic antioxidant. Less volatile than BHT. Low melting point, liquefies with minimal heat. Particularly effective in combination with aminic AO, YMD and K-CORR 1031
<b>NA-LUBE AO-242</b>	3,5-di-tert-Butyl-4-Hydroxyhydrocinnamic Acid Alkyl Ester	100% active highly effective phenolic antioxidant. Low volatility and low viscosity. Low sludge formation and light colour. Synergy with NA-LUBE AO-142.

Product	Chem. Description	Features and Benefits
<b>NA-LUBE ADTC</b>	Methylene-bis-(Dibutyldithiocarbamate)	Ashless multifunctional additive with excellent EP, AW and secondary AO properties. Outstanding demulsibility and good thermal stability. Excellent solubility properties in highly paraffinic base stocks
