

NA-SUL® - water emulsifiable Sulfonates

Product	Chem. Description	Features and Benefits
NA-SUL 450	Calcium Dinonylnaphtalenesulfonate/ Carboxylate/Alkanolamine (0,7%)/Ester	Free of mineral oil concentrate with excellent emulsifiable properties. Good rust protection for steel during storage and transportation. Deposits extremely thin hydrophobic films. Coating @ 5% is dry; Coating @ 10% is nearly dry.
NA-SUL 1101	Ammonium Dinonylnaphthalenesulfonate/Carboxylate	Highly effective and ashless protection of aluminum and zinc alloys. Low odor, does not contain petroleum oxidates. Excellent solubility in highly paraffinic base oils and PAO. Free flowing liquid, no melting required. Can be emulsified at moderate pH level.
